How to USE

| | | | Calculator Calendar CAS PlugIn Free TV+ | |
|------|-----------|---------------|---|-----------|
| | | | Internet TV+ | |
| Syst | tem Tools | Configuration | () Installation | Utilities |

 Then, You will see main menu in Internet TV+

- In New S/W,
- You can see Internet TV+ menu.

We would like to show you 2 kind of ways how to find Media URL address

1. Using S/W Tool : URL Snooper

- Run URL Snooper Program (download link)
- Go to the Site have video or audio clips (ex) Go to CNN.COM If you put only <u>http://www.cnn.com</u> URL, IPTV can not play this URL. You have to find media URL.
- Click the video that you want to see in CNN website
- > URL Snooper program will find a lot of URL's
- You have to find media URL in your program by searching filename extension such as mp4, flv, mp3, avi..etc

(ex) <u>http://ht.cdn.turner.com/cnn/big//world/2011/11/22/boulden-uk-thomas-cook-bad-</u>luck.cnn 640x360 dl.flv

→ This is the available URL and now you have URL address.

- ➤ Input this URL into the STB
- ➢ Now you can watch this contents in your STB

Please Watch the video in next page (You need WMV codec to watch video)
